ABOUT ME

Innovative and results-driven Frontend Developer with 3+ years of experience building scalable, responsive, and high-performance web and mobile applications. Specialized in React.js, React Native, JavaScript (ES6+), and modern frontend frameworks. Experienced in integrating real-time communication using Twilio APIs and SignalR, developing reusable UI components, and optimizing application performance.

WORK EXPERIENCE

Pakistan | 03/2023 – Present

Senior Frontend Developer

- Developed scalable React.js applications using reusable component architecture.
- Implemented real-time communication features using Twilio APIs and SignalR for audio/video and group calls.
- Improved application performance by optimizing rendering and component lifecycle management.
- Collaborated with backend teams to integrate REST APIs and deliver full-stack solutions.
- Resolved complex UI issues and improved application responsiveness across devices.

Key Projects

MaxChat – Communication Application

- Technologies: React.js, Twilio, SignalR
- Developed inbound, outbound, and group calling modules.
- Implemented real-time communication features.
- Integrated Twilio APIs for audio/video calls.

MaxChart – Healthcare Management System

- Technologies: React.js
- Designed and implemented Patient Module including CRUD operations.
- Developed document upload functionality and provider assignment.
- Enhanced system settings and patient management features.

UHS Web & Mobile Application

- Technologies: React.js, React Native
- Built Allergies Module for patient allergy management.
- Implemented add, update, delete, and record linking functionality.

MIS – Management Information System

- Role: Project Lead
- Managed Administration Module including company, department, team, and user management.
- Designed scalable architecture for ERP workflows.

Lottery Khel – Game App

- Technologies: React Native & React.js
- Developed frontend architecture for multiple games.
- Implemented authentication, coin system, and payment integration.
- Contributed 70% of frontend development.

GinERP – Enterprise Resource Planning System

- Role: Frontend Developer (React.js)
- Developed Dashboard UI with real-time data visualization and responsive layout.
- Implemented dynamic tab-based navigation system for better user workflow management.
- Built scalable Settings Module for system configurations and user preferences.
- Designed reusable React components to improve maintainability and performance.
- Integrated REST APIs with frontend for smooth data handling and state management.

Point of Sale (POS) System

- Role: Frontend Developer
- Developed POS Dashboard for real-time sales monitoring and analytics.
- Implemented Billing Module with dynamic item selection, quantity handling, and total calculations.
- Built Reports Module for sales reports, daily summaries, and transaction history.
- Created Settings Module for POS configuration and business rules.
- Ensured responsive UI for fast and efficient checkout workflow.

Distribution Management System (DMS)

- Role: Frontend Developer
- Developed responsive Dashboard for distribution and inventory overview.
- Built modules for Purchase, Sales, and Inventory management.
- Implemented dynamic tables and forms for product and supplier management.
- Integrated backend APIs for real-time data updates.
- Optimized UI performance and improved usability for business operations.

Business Websites

- Minahil Traders (Food Delivery Services)
- AK Painting Services
- Adil Cooling Services
- Riyadh Cooling Services
- MiTeq Creative Solutions

EDUCATION

Ghazi University | 2021-2023

MCS - Master of Computer Science

Bahauddin Zakariya University | 2018-2021

BSc Computer Science

TECHNICAL SKILLS

Frontend

- React.js
- React Native
- Redux
- Material UI
- Angular
- HTML5
- Tailwind CSS
- Javascript(ES6+)
- TypeScript
- Bootstrap

Backend

- PHP
- Laravel
- Firebase
- REST APIs
- SignalR
- Twilio APIs

Tools

- Git / GitHub
- Postman
- Wordpress
- IDEs (VScode)

Other Additional Skills

- Responsive UI/UX
- SEO Optimization
- Team Collaboration
- Project Management
- Digital Marketing(Canva)
